Communicate in the moment with GoVisual app for iPhone and iPad. Add an image to your blank canvas to create a visual scene, play a video, and create a video scene display. Just-in-time programming makes it easy for kids to draw a hotspot, add text, or record a message for playback. Enriches language development while providing powerful communication in the interaction! GoVisual includes the Transition to Literacy (T2L) feature—a word pops up on display in the scene for 3 seconds of on-screen time.

This T2L technique is proven effective in research studies at Penn State University, [www.RERC-AAC.PSU.edu](http://www.RERC-AAC.PSU.edu).
