

Welcome to USSAAC's Webinar Series, June 7, 2016

Supporting Effective Patient Provider
Communication for Vulnerable Children
and Adults across Medical Settings and
Situations

Presenter: David R. Beukelman

Facilitator: Wendy Quach

Supporting Effective Patient Provider Communication for Vulnerable Children and Adults across Medical Settings and Situations

David R. Beukelman

Institute for Rehabilitation Science and
Engineering

Madonna Rehabilitation Hospital

Webinar: June 7, 2016

Disclosures

1. Co-Author/Editor of book: Blackstone, S., Beukelman, D., & Yorkston, K., (2015). PPC in Medical Settings (Plural Publishing).
2. Partner in the Rehabilitation Engineering and Research Center for AAC
3. Senior Researcher in the Institute for Rehabilitation Science and Engineering
Madonna Rehabilitation Hospital
4. Emeritus Faculty at University of Nebraska, Lincoln

Acknowledgements & Thanks

- 1. Co-authors of PPC Book** (Their information is included throughout this presentation): S. Blackstone, K. Yorkston, C. Baylor, M. Burns, M. Morris, T. McNalley, J. Jackson Kailes, R. Hurtig, M. Nilsen, M. Happ, J. Costello, R.,. Santiago, Amy Nordness, L. Bardach.
- 2. Professional Consultants:** Abbe Davis, Carol Gaebler, Susan Fager, Gail Finsand, Tabatha Sorenson, Amy Nordness, Suzanne Seberg, Marsha Sullivan, Carrie Windhorst, & Cheryl Wagoner
- 3. Patient Consultants:** Amy, Cora, John, Merle, O'Linda
Tim, Tom

What is Effective PPC Communication?

- **Effective communication** is the successful **joint establishment of meaning** wherein patients and providers exchange information, enabling patients to participate actively in their care **from admission through discharge**, and ensuring the responsibilities of both patients and providers are understood. (Communication in Medical Settings, Joint Commission Definition (2010))

Patient Provide Communication Issues

- Why is PPC important?
- Who is responsible for PPC?
- How does PPC fit into medical policies, practices and cultures?
- What policies and practices support PPC in medical situations?
- What PPC materials are available online?

Communication Vulnerable People (“Patients”-if under medical care)

1. People with **pre-existing disabilities** that affect communication
2. People with **recent onset** (first time) communication disorders (stroke, TBI, SCI)
3. People with recent communication limitations due **to medical interventions** (intubation, tracheostomy, ventilator, laryngectomy, surgery to speech mechanism)
4. People with **native language** and cultural barriers
5. People with limited **health literacy**

Who are Responsible for Supporting Effective Communication? (Intermediaries)

1. **Communication Coordinator** for Facility or Medical Unit
2. **Daily Communication Facilitator** for Individual Patient
3. **Unique Communication Partners** Support & Training (Family, Medical or Care Provider, etc.)
4. **Legal Communication Intermediary** for individual patients in legal procedures (will, court, end of life, business, child custody, etc.)—Ethics Committee.
5. **Medical, health, language (cultural) interpreter** for patients with foreign primary language or minimal medical awareness or background.

PPC: My Observations of MY Geographic Region

1. Outpatient medical visits are supported by family & friends
2. Emergency Care: Very inconsistent, depends on organization
3. Acute care units are highly variable (even within the same hospital)
4. ICU units often depend on an advocate (SLP, nursing, medical personnel)
5. Inpatient rehabilitation units are quite organized-usually with identified coordinator, facilitator, available PPC materials, referral strategies and team communication strategies in place.
6. Long-term Residential Care often depend on advocates (staff & family)
7. Hospice units are quite well managed
8. PPC support efforts managed advocate(s) without policy usually disappear when the advocate leaves

PPC Policies & Strategies

- Because PPC supports services are so inconsistent, there is a need to evaluate these services at a patient and a unit/agency level.
- The next section of the presentation will focus on policies and strategies. The remainder of the presentation will focus on practices and materials for different communication vulnerable individuals.

Establish a Referral Policy for PPC Support

How can Communication Supports be Ordered?

(Referral Options/Policies)

1. Specific Order
2. General Order
3. Standing Order
4. Care Map
5. Other Practices?

Specific Order (Referral)

A **Specific Order** (Referral) specifies the transfer of care for a **specific patient** from one clinician to another or a request made for assistance or a specific action.

The act of sending a **specific patient** to another clinician(s) for a second opinion, ongoing management of a specific problem, or authorization to obtain care from a specialist or agency.

General Referral

A **General Referral** is filed for a specific patient prior to his admission to a medical setting and to be activated on admission to a medical facility. For example-- if a patient with a prior communication condition is living in long-term residential care facility or at home, a general referral could be filed to specify that an AAC device or material set would be incorporated into the health care management when patient is admitted into the local hospital, care facility, hospice, etc.

Standing Order

A **Standing Order** usually names the medical condition and prescribes the action(s) to be taken for patients with the procedures and strategies documented in an Order Set

Medical Conditions

TBI

SCI

Aphasia

Oral/Laryngeal Cancer

Interventions

Tracheostomy

Intubation

Laryngectomy

Neuro Surgery (communication)

Order Set

The **Order Set** includes the specification of the procedures (including communication supports) that are included in a Standing Order

Care Maps

A **care map** describes the steps and decision points in the care providers' management of a **condition**. It is based on medical guidelines, recent evidence, and expert consensus. A **care map** is made up of one or more pages which together show the complete patient journey for a condition. (Quite common in rehabilitation situations)

Who (or What) Initiates PPC Support for a Specific Individual/Patient

- _____ Physician or Physician Assistant (Hospitalist)
- _____ Communication vulnerable individual
- _____ Family member or personal advocate
- _____ AAC specialist
- _____ Communication or AT specialist
- _____ Medical personnel

- _____ Medical Situation
- _____ General Referral (based on medical condition or communication need)
- _____ Medical Care Map

Establishing and Maintaining a Communication Tools Center (Facility or Unit Based)

Low Tech Communication Books & Boards
(Unit level)

High Tech Communication Tools with Expert Support
(Facility level)

In-patient—Child and adult

Out-patient—Child and adult

Enter Communication Support Strategies for Specific Patient into Medical Records

1. Document in Electronic or Paper Medical Records
2. Internal Document
Treatment Card
Sticky Note
3. Include a check-list of optional communication supports in medical records and Identify those options in use with a specific patient

Display Communication Support Strategies Prominently

Display in patient room
Following facility
guidelines
Encourage
consistency in use

Patient: _____ Today's Day/Date: _____ Room/Bed#: _____ Physician: _____ Your Nurse/Caregivers: _____	Goal Date For Discharge: _____ Planned Discharge Time: _____ Ride Home Arranged? _____ Discharge Goals: <input type="checkbox"/> I can be safe in my home <input type="checkbox"/> Safety risks addressed <input type="checkbox"/> Learning needs met <input type="checkbox"/> My pain is controlled	
Goals For Today: _____ _____ _____	Patient/Family Questions or Issues: _____ _____ _____	Mobility: 1 2 3 4 <input type="checkbox"/> cane <input type="checkbox"/> walker <input type="checkbox"/> wheelchair <input type="checkbox"/> other: _____ special instructions: _____
		Meals: Dial 6325 (MEAL) or 763.6325 (From the Outside) 

Access AAC Specialist (When Needed)

1. Collaborating with AAC Specialist who has previously (or is currently) served an individual with pre-existing condition.
2. Referring to an AAC Specialist if PPC needs exceed the expertise of the unit staff.
3. Assisting recent onset patient to identify an AAC specialist if one is needed following discharge.

Providing Instruction & Training to Medical (and Care) Personnel

1. New Employee Training
2. Unit Orientation (Hospitalist, SLP, Head Nurse,
or (at times) a Family Member
3. Annual Mandatories
4. Scheduled Updates
5. Other Training?

PPC Support for Communication Vulnerable Individuals for Medical Appointments/Evaluations

Preparing for Medical Encounters

Focusing on their (1) communication limitations and (2) their unique communication needs in medical settings.

What communication content is needed?

When does preparation occur?

Who prepares for medical encounters?

Preparing people with CCN for Predictable and UnPredictable Medical Encounters

Predictable: Outpatient visit, annual medical evaluation, commonly occurring medical evaluations, recurrent medical conditions (pneumonia, upper respiratory illness)

Unpredictable: emergencies/disaster scenarios, unexpected medical conditions or injuries

Who Prepares Pre-existing Conditions: Family Schools, Agencies, Clinics, Private Practice

Office Visits: Targeting Both Sides

Communication Strategies for Medical Staff

1. Have the person's attention before you speak.

Eye contact

Make sure they can see your mouth and face

2. Minimize or eliminate background noise if possible (music, TV, radio, other people).

3. Keep your own voice at a normal level.

“I'm not deaf I have Aphasia!”

4. Keep communication simple, but adult.

Just the facts

5. Confirm that you are communicating successfully with “yes” and “no” questions.

6. Repeat statements or directions when necessary

Confirmation

Write down key words

7. Give them time to speak, resist the urge to finish sentences or offer words.

8. Support communicate with drawings, gestures, writing and facial expressions.

Whiteboard/paper and black marker large print

Boogie Board

Basic Training for MDs: Communication Skills

SEGUE Framework (Makoul, 2001)

Organizes important communication steps into checklist

Used in a variety of medical situations

Setting the stage

Eliciting information

Giving information

Understanding the patient's perspective

Ending the encounter

Medical Visits/Evaluations for Communication Vulnerable Individuals with Pre-existing Conditions

1. Personal Information & Medical information
2. Information/Instructions about Care Needs and Special Equipment
3. Prepare Communication Assistant or Intermediary (facilitator)
4. Prepare for Outpatient Appointments & Evaluations
5. Prepare for Transitions to Medical Stays

How should we prepare the Patient?

PACT

- P** - Prepare before the visit
- A** - Ask questions from a prepared list
- C** - Construct a plan with the provider
- T** - Take-away materials so the patient, caregivers, patients, family remain informed.

Pre-existing and Recently Occurring Medical Conditions

Personalize PPC content and support materials.

Materials: patientprovidercommunication.org

Prepare Answers for Symptom Related Questions from Medical Providers

1. What are your symptoms?
2. When did they start?
3. How long do they last?
4. How often do they happen?
5. Does anything make them worse or better?
6. Do they prevent you from doing anything?

Questions to be Asked by Outpatient

1. What is my diagnosis, cause?
2. How long will this last?
3. Under what conditions should I call/come back
4. What test are being done? When results? Call?
5. What treatment best for me? Side effects?
Alternatives?
6. Medications? Side effects? Will it work? When take?
How long? What if I don't take?

Take Home Message

1. Communication involves patients, providers, and support people
2. Health care providers want to do well, but they may not know how
3. Training them to use simple, consistent strategies may help

Evaluation: PPC Support for a Patient or a Medical Situation

Name: _____ Number _____ Room _____

Medical Situation (All that apply)

Medical (Doctor) Visit _____ Medical Evaluation _____ ICU _____
Acute Unit _____ IP-Rehab _____ OP-Rehab _____
Long-term Residential _____ Hospice _____ Other _____

PPC Needs (All that apply)

Pre-existing _____ Recent-onset _____ Intervention-based _____
Language/ Cultural _____ Health Literacy _____ Legal _____

PPC Support

Absent or Occasional PPC Support: ___ Yes ___ No ___ %

Consistent PPC Support: Yes No %

Managed by Family Member or Friend: ___ Yes ___ No ___ %

Managed by Employee Volunteer ___ Yes ___ No ___ %

Organizationally supported & managed: Yes No %

Managed by Assignment of Staff: ___ Yes ___ No

Specific Patient Facilitator: ___ Yes ___ No

Unit PPC Coordinator: Yes No

Evaluation: PPC Support for a Patient in a Medical Situations (Continued)

Personalization of PPC Support

1. Are PPC supports personalized for individual access, language, cognition, & social communication needs?

Yes _____ No _____ N/A _____

2. Are PPC supports personalized for unique medical needs of this individual? _____ Yes _____ No _____

3. Are PPC supports personalized by unique legal, care, or decision-making needs of individual? Yes ___ No _____ N/A _____

4. Are PPC supports personalized for the specific medical setting (situation)? Yes _____ No _____ N/A _____

5. Are PPC supports routinely available for this individual patient and medical/care staff? Yes _____ NO _____

PPC Checklist

1. Is there a PPC unit/facility PPC coordinator? _____
2. Is a communication facilitator assigned to each patient with PPC needs to support their communication needs, materials, technology use? _____
3. Are PPC materials available on the unit? ____.
4. Are PPC materials selected for specific patients routinely accessible to them? _____
5. Are (new) staff trained to communicate effectively with these patients? _____

PPC Checklist (Continued)

6. Are appropriate PPC messages represented? _____
7. Are PPC options posted in patient's room? _____
8. PPC options posted in patient's medical chart? _____
9. When an electronic communication device is used by patient, is the device ? _____
 - A. Routinely accessible to patient _____
 - B. Electrically charged daily _____
 - C. Regularly cleaned _____
 - D. Appropriate staff trained _____
 - E. Appropriate PPC messages stored in device _____

PPC Checklist (continued)

10. Do patients with PPC needs have
 - A. a health history document? _____
 - B. a list of questions for physicians? _____
 - C. a list of response options for physician/nurse health related questions? _____
 - D. a list of current medications? _____
 - E. a list of contact information? _____

Who and When

- Preparation by individual with CCN, Family, AAC support personnel
- Prepare in advance
- **Whose Job is in Anyway?**
 - School Personnel
 - Private Practice
 - Family

Pre-intervention Evaluation and Communication Support Development

1. Respiratory Related Intervention

Ventilator support needed?

Intubation, Tracheostomy

2. Surgery of Speech Mechanism

Head and Neck Cancer

Injuries

3. Inability to Move Arms following the Intervention

PPC Evaluation BEFORE Medical Intervention

Device Trials

Prior to procedure to ensure:

Ease of use

Accurate messaging

Message Banking

Temporary or permanent loss of speech

**TRY TO AVOID COMMUNICATION FAILURES
THAT PLACE A PATIENT AT LEGAL, SOCIAL OR
HEALTH RISKS**

When are Services Requested?

1. Prior to Intervention—**Standing Order**
2. Immediately upon arrival – **Standing Order**
3. Upon arrival of **specific order**—when medical examination or consultation is completed
4. After **breakdowns** in communication occurs
5. Medical Stability - Time for recovery
Example: Post-extubation
6. During **decision-making**: medical care options, discharge plans, legal issues, end-of-life,

Inpatient Rehabilitation Communication Issues

Admission

Patients and legal guardian consent to treatment, specific procedures, medical confidentiality, & other legal documents

Familiarize with facility—digital images

Establish Overall & Specific Goals

Patient & Staff Getting to Know Each Other

Likes, dislikes, hobbies, favorite music, family member names, etc.

Continued

Patient Input to Team

Expression of appreciation

Concern about lack of progress

Possibilities of Discharge

Problems with team or staff member

Request More Complete Explanations

Adjusting Participation Levels in Tx.

Communication with Care Staff

Review Menu Options & Order Food

Communicate—medical conditions,
positioning, adapted access to electronics

Resolve Disagreements—TV use & choices,
problems with room-mate (?), temperature
in room,

Discharge Planning

Location:

Home (with or without home care or renovation),

Long-term residential (assisted living, nursing home option)

Outpatient Rehabilitation

Managing Medications

Financial Issues

Communicating with Circle of Support/Friends:
explaining to friends and family

Transition of (new) Life Roles

- Work

- Retirement—new social roles and activities

Long-Term Residential Care

1. Communication intermediaries in this setting???
2. Worry (fear) of the Future
3. Information Complexity—staff
4. Clarification of Participation Expectations
5. Identify policies that could potentially conflict with the use of communication support materials

Policies Regarding Communication Strategies

1. Identifying PPC Needs that Require Support
2. Availability of Communication Support Materials & Technology
3. Communication Types—Needs, Caregiving, Narrative Communication
4. Communication with Social Network (????)

PPC Strategies: Hospice/End of Life

1. May require different communication supports than traditional medical care did.
2. Pain, anxiety, nutrition management, Call Alerts
3. Communication about end-of-life decisions
 - Terminate interventions, treatments, or supports
 - Change or confirm end-of-life legal papers or agreements
 - Change or implement DNR (Do Not Resuscitate) Order
4. Important end-of-life messages to family, friends, spiritual counselors

Topic Resources

- Hard Choices for Loving People (Dunn, 2008)
 - Resuscitation?
 - Artificial nutrition or hydration?
 - Hospitalization?
 - Shift care from cure to hospice or comfort care?

Five Wishes

(www.agingwithdignity.org)

Who will make care decisions when I cannot.

What medical treatment do I want or not.

How comfortable I want to be.

How I want people to treat me.

What I want my loved one to know.

Four Things that Matter Most (Byock, 2004)

Please forgive me.

I forgive you.

Thank you.

I love you.

Effective Communication

is

ESSENTIAL!!!
